

Hermetic & form-stable

Quadro NUT bag

for Modified Atmosphere Preservation

The Quadro NUT bag has a unique, vacuum-proof & formstable liner inside that allows you to modify the atmosphere inside. The 7-layer, high-barrier plastic liner (140μ), protects your commodities from external threats (e.g. water/humidity, insects, pollution) while optimum internal (gas) conditions preserves the quality during the full supply chain. Use CO₂ to eradicate possible infestation and suppress bacterial development and/or N₂ to minimize oxidation/rancidity.

The form-stability, allows easy & optimum container loading, with up to 20% more loading compared to regular big bags. The wide, square base of 105x105cm (unfilled) makes these bags extremely stable, once filled correctly*. Since the liner is sewed over all horizontal corners to the outer bag, spilled products will stay on top and cannot come in between the liner and outer bag. This avoids possible contamination during the discharge process.

- Perfect square shape (105x105cm ~115x115cm after filling)
- Extreme stability
- BRC Food Grade certified

Modified Atmosphere for:

- Preserve optimum quality & maintain optimum moisture content
- Organic eradication of infestations (by use of CO₂ gas)
- Avoid reinfestation
- Avoid oxidation or rancidity
- Suppress bacterial development
- Keeps product & warehouse clean
- Protects against fumes

* Ask vQm for the filling instructions / recommendations!

Technical data:

Outer bag : type 4 Panel, Type A, Food Grade

Internal Sizes : 1050*1050*1800mm

Body & bottom fabric : PP 180g/m², no coating. Treatment anti-UV 150 Kly. double chain sewing

Lifting : 4 corner loop side seams, blue, PP, width 50mm, free loop 250mm,
450+250*2+1000mm

Filling : Duffle, H: 800mm, PP75+25g/m², coating inside, 1pcs tie tape for duffle.

Discharging : Spout, Ø :400mm – H :500 mm, PP75+25g/m², coating inside, spout tied with 1pc white color tie.

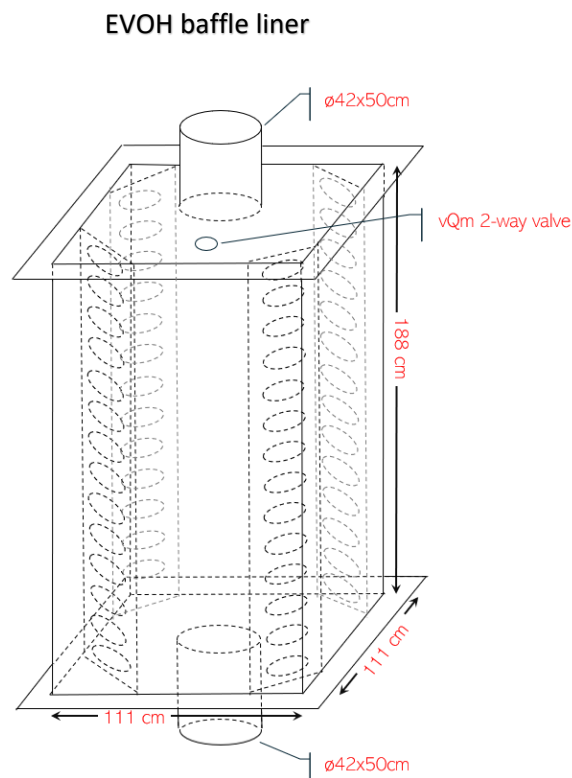

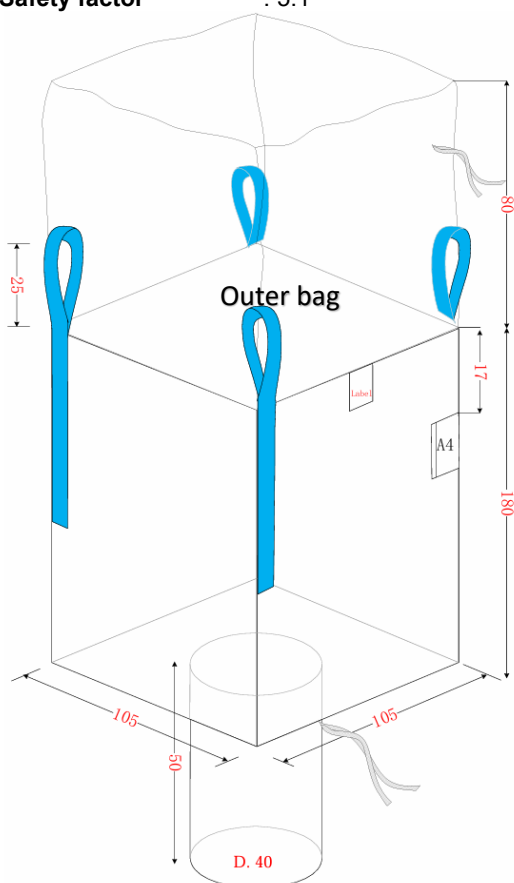

Liner : EVOH baffle liner, 140mic

Doc-pocket : 1pcs, PE 250*300mm, 17cm from top, be sewn under webbing. Double sided tape on pocket top and bottom.

Printing : No printing (optional only)

Safe Working Load : 1200 kg

Safety factor : 5:1

Hermetic & form-stable

Quadro RICE bag

for Modified Atmosphere Preservation

The Quadro RICE bag has a unique, vacuum-proof & formstable liner inside that allows you to modify the atmosphere inside. The 7-layer, high-barrier plastic liner (115µ), protects your commodities from external threats (e.g. water/humidity, insects, pollution) while optimum internal (gas) conditions preserves the quality during the full supply chain. Use CO₂ to eradicate possible infestation and suppress bacterial development and/or N₂ to minimize oxidation/rancidity.
